Banasree, Dhaka, Bangladesh | (+880)1647153119

## TECHNICAL SKILLS

---

**Languages & Concepts:** JavaScript/TypeScript (ES6), Python, HTML, CSS, SQL, Liquid (Template language for shopify), OOP, JWT, Microservices, LLM RAG

**Frameworks & Libraries & Runtime:** Next.js, React, Tailwind CSS, MUI, Shadcn/ui, Zustand, Node.js, Express.js, Hono.js, Bun (Learning), FastAPI, Mongoose

**Databases:** PostgreSQL, MongoDB, MySQL

**Tools & DevOps:** Git, Docker, WebSocket, AWS, Jira

## EXPERIENCE

---

**Development Team Lead**, SM Technology (BDcalling IT) - Dhaka, Bangladesh July 2025 - Present

- Led and mentored a team of 10+ developers, driving delivery of scalable e-commerce solutions and improving productivity through structured planning and task ownership
- Improved backend performance by ~30% by refactoring and optimizing a legacy codebase, removing outdated code, and implementing scalable architecture and best practices
- Built an npm package, accelerating MVP delivery and improving client development speed by ~15%

**Web Developer**, SM Technology (BDcalling IT) - Dhaka, Bangladesh December 2024 - June 2025

- Reduced client development costs up to 23% by transitioning from a custom backend to a Shopify headless architecture using Next.js, GraphQL, and S3, while maintaining scalability and performance
- Built a custom product builder using HTML Canvas with cloud storage, integrating a Node.js backend with Shopify via API gateway and Socket.io to enable real-time interaction and seamless user experience, increasing client sales by up to 22%
- Developed an internal project management system using Next.js, Hono.js, Zustand, and PostgreSQL on Supabase, streamlining workflows and improving team efficiency and task visibility

**Jr. Web Developer**, SM Technology (BDcalling IT) - Dhaka, Bangladesh May 2024 - November 2024

- Designed responsive HTML/CSS templates for clients.
- Built custom Shopify sections using Liquid and JavaScript for flexible theme customization

## PERSONAL PROJECT

---

### ACE-STEP-1.5 - Cloud Version ([See Here.](#))

- Built a cloud optimized version of LLM API with one-command. Removed unnecessary code and fixed MLX-related issues, improving stability and inference performance by ~25%.
- Developed python FastAPI based inference API with optimized VRAM model loading/unloading, improving response efficiency by ~35% and enabling efficient cloud usage

### React Timeline Editor ([See Here.](#))

- Forked an open-source project and extended it with custom features .Built custom React type-oriented components to enhance functionality . Upgrading the project to React 19 with the new compiler for improved performance and modern features

## EDUCATION

---

**Southeast University**, BS in Computer Science
